Mr. Sergio Molina
8238 Dà. Shore Dr.
Chicago, IL 60617

Dear Mr. Molina,

I appreciate the effort and cost to which you went to send me your preparation on the electronic assassin relating to the assassination of President Kennedy.

My age and the limitations imposed by my health make it impossible for me to explore this any further.

I do see several potential probaems with it that I draw to your attention in the event you try to interest anyone else.

One is that you assume that what you draw upon from the Warren Commission materials is correct and in some instances it is not correct.

Another is the complete lack of any descripfion of the mechanism itself.

You ought also be aware that rather than controlling the CIA Hoover was usually fighting with it.

Sincerely,

Harold Weisberg
